

Easy guide to Laptops, tablets & netbooks

From the geeky to the fun, everything you need to know and more

Welcome

to our easy guide to laptops, tablets & netbooks

Whether it's about time to replace that worn out PC or you need to get properly kitted out for work, college or University, [e2save](#) has a fantastic choice of Laptops and Netbooks for you to choose from. Take a look through our guide, filled with handy info designed to help make the right choice for you. Whatever your needs or budget, you can choose to take one of our fantastic products as a free gift with a [contract mobile phone](#), or with a [mobile broadband](#) package.

So what is mobile broadband?

Put simply it means no wires, no hassle, simply plug and play. Mobile broadband is completely separate from your mobile phone contract, no BT line is required. A simple way to get connected to the Internet. And if you don't yet have a laptop or netbook, don't worry, we will give you one as part of your mobile broadband package!

Things to consider before you buy

Processor

The brains of the operation.

Consider the processor as the brains behind your [laptop/netbook](#), with its power measured in Gigahertz, which is shortened to 'GHz'. A basic netbook may have a 1GHz processor, whilst a premium range laptop could have 2.6GHz. The larger the processor, the more power and speed available.

Weight

Mini and light or multimedia monster?

[Netbooks](#) are designed to be lighter and more portable than [laptops](#). If you are planning to carry your laptop or netbook around with you regularly, then weight is important.

Hard drive

How much stuff can I store?

Your hard drive is the amount of memory available for storing files (such as music, video, games etc), it is measured in Gigabyte, which is shortened to 'GB'. [Netbooks](#) generally have smaller hard drives than [laptops](#), due to their size and keeping the cost down. A smaller hard drive on a netbook could be 100GB but on laptops they can be up to 500GB and more.

Wi-Fi

The freedom to browse.

The majority of modern [laptops](#) and [netbooks](#) have wireless Internet or Wi-Fi as standard. It allows you to connect to the Internet anywhere within your home or Wi-Fi hotspot.

RAM

Full speed ahead!

RAM stands for random access memory, which already sounds complicated doesn't it? RAM is a type of memory that dictates how much you can do, or multitask at once and how fast you can do it. So the more RAM, the more programs and applications your [laptop/netbook](#) can run and the faster it will be perform.

Screen size

From compact to mini cinema!

Screen size varies greatly between [netbooks](#) and [laptops](#) and the right size for you is all down to what your requirements are. Smaller displays start from about 10 inches and are lightweight and portable. They can be as large as 17 inches on larger laptops, which is superior for multimedia use, gaming etc.

Tablets

Samsung GALAXY Tab

Samsung Galaxy Tab

Sleek, slender, and manageable is encapsulated with the [Samsung Galaxy Tab](#). The tab runs the popular Google Android operating system that has recently taken the mobile world by storm. This software opens up a whole world of popular apps and features which are enhanced even further through the tabs 7 inch screen.

Be
anything

No need to worry about the tab slowing down, as the built in 1Ghz processor is powerful enough to multitask.

The geeky bit

- Specs**
- Android 2.2 running TouchWiz 3.0
 - 7-inch TFT LCD - 1024 x 600 resolution
 - Weighs 380 grams
 - 1GHz Cortex A8 processor
 - 16GB or 32GB internal storage
 - Front-facing 1.3 megapixel camera
 - 5GHz dual-band 802.11n WiFi
 - Full HD video playback

What is a tablet?

[Tablets](#) are the latest in touchscreen computing, boasting touchscreen displays and the majority of features you would find on a PC, at a fraction of the size. A Tablet could be thought of as somewhere between a [smartphone](#) and a [netbook](#). Stylish and compact, they are the most portable computer to date.

Accessories range

Whether you are looking to get a new [laptop](#) or [netbook](#) or already own one, we have a great range of [accessories](#) that will improve your experience. Below is just a selection of what laptop and netbook essentials we have on offer, be sure to check out our full range, including [accessories for mobile phones](#) too!

Webcam

Why do I need one?

Why not send a video message instead of an email, or video chat live on programs such as MSN messenger or Skype? With a webcam you can do just that and more.

[More info >>](#)

Cases & sleeves

Why do I need one?

Essential for protecting and transporting your laptop or netbook, to keep it safe from knocks, cracks and other damage.

[More info >>](#)

USB memory stick

Why do I need one?

USB memory sticks are essential for storing and transferring documents, pictures, music, videos and more. They are easy, affordable portable storage.

[More info >>](#)

Mice

Why do I need one?

Although your laptops trackpad (which acts as a mouse) is great on the move, with a mouse you can enjoy quicker, easier, accurate navigation.
